

USING WITH SONY ERICSSON K700i

a. ACTIVATING THE BLUETOOTH

You must activate the Bluetooth feature of your phone to establish a Bluetooth connection between your mobile phone and other Bluetooth devices.

1. Press  to access Main Menu.
2. Scroll to **Connectivity**, *Select. Bluetooth, Select. Turn On, Select.*
3. Continue pressing  to exit.

b. PAIRING TO THE CELLULAR PHONE

Pairing will create a link or connection between your two Bluetooth devices, the Headset and your phone.

1. Bring the cellular phone at about 20 cm from the Headset.
2. Detach the Headset from the holster/base.
3. Ensure that the Headset is turned off (see *B.Turning On/Off the Headset*).
4. From the OFF state, press the multi-function button for 10 seconds until you hear a distinctive three-tone sound and the Bluetooth indicator LED changes from blinking blue to alternate blinking of red and blue. This indicates that the unit is now ready for pairing.
5. Press  to access Main Menu. Scroll to **Connectivity**, *Select. Choose Bluetooth, Select.*
6. Scroll to **My devices**, *Select. New device, Add.* The phone will then search for pairable devices to be added.
7. The searched devices will then be displayed. Choose the device name you want to pair with this phone, then press *Select.*
8. Enter "0000" as the passcode then press **Ok**. If pairing is successful, the alternating red/blue lights (*Bluetooth Indicator*) will stop and will change to plain blinking blue.
9. Your device name is now added under **My devices** tab. Highlight the newly paired device and then press **Connect** to completely establish connection between your mobile phone and your Headset.
10. When a statement appeared indicating that your device is connected, continue pressing  to exit.
The Headset is paired and ready to use.

Notes: You only have to do the pairing process once for a particular phone. You will only redo the process if you want to pair it with another mobile phone. If you turn off your Headset, it will be disconnected with your phone. If you turn it back on, you can reconnect by making a call and apply audio transfer during an ongoing call.

c. ANSWERING/RECEIVING A CALL

When the phone is receiving a call, dissimilar ring tones will be heard on the Headset and on the phone.

1. Just shortly press the multi-function button to answer the call.
2. In your mobile phone, a question will be displayed "**...Answer?**" If you press **YES** button on your phone as reply, audio will be on the phone.
3. To terminate the call, shortly press the multi-function button.

d. MAKING A CALL with the Headset on

Normal dialing

1. Enter the contact number and press **Call** key. Audio will be heard on the Headset.
2. Shortly press the multi-function button to terminate the call.

Voice dialing

Make a call by saying a voice name/voice tag.

But first, refer to step h and i for the procedure when activating and recording for voice dialing.

1. Shortly press the multi-function button to activate voice dialing.
2. A beep will then be heard on the Headset prompting the user to say a voice name/voice tag of the person to call.
3. Say a voice name. The name will be played back to you. The phone will then place the call automatically. In case the cell phone does not recognize the name spoken, the steps above may be repeated.
4. Press the multi-function button to terminate the call.

Redialing

Press the multi-function button twice quickly to redial the last number.

e. AUDIO TRANSFER

Audio Transfer can be done during an ongoing call.

Headset initiates Audio Transfer to phone: Press the multi-function button two times quickly.

Headset initiates Audio Transfer to Headset: Press the multi-function button once.

Note: Using your phone, access  (Menu button) during an ongoing call to transfer sound to the Headset or to your phone.

f. REJECTING A CALL

Shortly press the multi-function button twice quickly to reject an incoming call.

g. SETTING THE VOLUME

The Headset has a digital volume control which can be accessed through the *multi-function button*. Volume setting can be done during calls only.

1. Switch the multi-function button in a forward direction to increase the volume.
2. Switch it backward to decrease the volume.
3. Continuous switching of the multi-function button (*forward or backward*) can rapidly increase or decrease the volume. *If the volume set is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.*

g. ACTIVATING THE VOICE DIALING

Before voice dialing, you must first activate the *voice dialing* function of your cell phone and record a voice command for a particular contact.

1. Press  to access Main Menu. Scroll to **Settings**, *Select. Voice control, Select. Voice dialing, Select. Activate, Select.*
2. Continue pressing  to exit.

h. RECORDING FOR VOICE DIALING

Note: Voice dialing entries must be stored in the phone's memory (not on the SIM card!).

1. Press  to access Main Menu. Scroll to **Settings** and press *Select*. Choose **Voice control**, *Select. Voice dialing, Select. Edit names, Select. New voice, Add.* (Contacts list will appear).
2. Choose among the contacts whichever you want to have a voice name/voice tag. When it's highlighted, press **Select**.
3. Follow the instructions that will be displayed on screen.
Note: You may use any word(s) or just say the person's name for a voice tag.
4. When your spoken word(s) is caught up by the phone, it will ask you to listen to your recording and will ask the question, **"Is it ok?"**.
5. As soon as you press **Yes** as reply, your voice command will be saved. Under Voice Commands tab, a callout icon  will appear next to a contact name which has a voice command.
6. Continue pressing  to exit.

Note: Noisy environment could affect voice recognition. Record in a quiet environment.
