

## USING WITH SONY ERICSSON P800/P900

### ACTIVATING THE BLUETOOTH

You must activate the Bluetooth feature of your phone to establish a Bluetooth connection between your cell phone and other Bluetooth devices.

1. Turn the Flip to open position. In standby view, the phone will show shortcuts to commonly used applications. Select and tap **Control Panel > Connections > Bluetooth > Settings**.
2. On the **Operation mode** box, tap **On**.
3. Tap  to exit and return to standby view.

### PAIRING TO THE CELLULAR PHONE (Not possible while charging the SuperTooth II)

Pairing will create a link or connection between your two Bluetooth devices - the SuperTooth II kit and your phone.

1. This SuperTooth II kit supports either **Handsfree** or **Headset** pairing mode. First, refer to **Compatibility Table** for suggested pairing modes to be able to determine what pairing mode is best for your phone. **Handsfree** and **Headset** profile differs in pairing procedure. (*Note: In the Compatibility Table, you can find that Sony Ericsson P800/P900i belongs to Headset Profile.*) Proceed with the instructions.
2. Bring the mobile phone at about 20cm from the SuperTooth II.
3. The SuperTooth II is initially off. Turn it on by flipping up the **Swivel Arm(1)** to 55° position. The **Bluetooth Indicator(9)** will glow (*blue blink*).
4. Simultaneously press the **Reject Button (2)** and **Pick-Up/Hang-Up Button (7)** for about 10seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in **Handsfree Pairing Mode**.
5. **Shortly press the Pick-Up/Hang-Up Button again for a short time, to access Headset Pairing Mode.** The blinking speed becomes faster.
6. Turn the Flip to open position. In standby view, select and tap **Control Panel > Connections > Bluetooth>Devices**. *Bluetooth devices* screen appears. Tap **Add**. The phone will then search for pairable devices until it displays them in the list.
7. Choose the name of this kit (SuperTooth II).
8. When the phone asks for a passkey, write 0000 on the screen using the stylus or tap 0000 using the on-screen keyboard  found on the lower left corner (status bar) of the screen area.
9. Tap **Done** tabs. Pairing is successful if the alternating red/blue lights of Bluetooth Indicator stop and then change to plain blinking blue.
10. Before going to exit, remain under *Bluetooth Devices* screen, highlight again the paired device (*SuperTooth II*), select it, then tap Allowed to connect without confirmation checkbox.
11. Press **Done** tabs as needed.
12. Finally, tap  to exit and return to standby view.

The SuperTooth is paired and ready to use.

### ANSWERING / ENDING A CALL

When you receive a call, ring tone will be heard simultaneously on the SuperTooth II and on the phone or on the SuperTooth II only (*depending on your phone model*).

1. Just shortly press **Pick-Up/Hang-Up Button(7)** to answer the call.
2. When communication is over, press the **Pick-Up/Hang-Up Button(7)** to end the call.

### MAKING A CALL

#### **Normal dialing**

1. Enter the contact number and send. Normally, audio will be on the kit.  
**Note: With some phones like Siemens S55; Panasonic X70, audio is always on the phone during an outgoing call. You will need to press Pick-Up/Hang-Up Button(7) to transfer the audio to your kit. (Also, refer to "Compatibility Table" for other helpful remarks.)**

#### **Voice dialing**

**Note: Voice dialing entries must be stored in the phone's memory (not on the SIM card!).** First, you have to turn on the voice dial function and record for a "voice command" or "voice tag"

in your phone. Record your voice command in a quiet place so that only your voice will be recorded on the phone.

1. **Activating the Voice Dial Function:** Before voice dialing, you must first activate the *voice dialing* function of your cell phone and record a voice command for a particular contact.
2. Turn the Flip to open position. In standby view, tap **Phone > Edit > Preferences**. A list of features will appear.
3. Tap **Voice Control >** tap checkbox aligned to **Voice dialing >** tap checkbox aligned to **Play caller name**.
4. Tap **Done** tabs.
5. Tap  to exit and return to standby view.
6. **Recording for Voice Dialing:** Turn the Flip to open position. In standby view, tap **Contacts**.
7. Tap the contact where you want to add a voice name or voice tag. Tap **Edit > Edit Contact >** tap  on the Button bar > tap **Record**. Follow further instructions on the phone.
8. To check if your recording is good, tap **Play**. If not, tap **Record** again. Tap **Done** when desired voice is attained.
9. Tap  to make another record and repeat the steps above or tap  to exit and return to standby view.

When recording is done, execute voice dialing using your SuperTooth II by proceeding with the instructions.

10. Shortly press **Pick-Up/Hang-Up Button(7)**.
11. A beep will then be heard on the SuperTooth II prompting the user to say a voice command or voice tag of a person to call.
12. Say the voice name. The voice will be played back to you (audio on kit). The phone will then place the call automatically.

### REDIALING (Handsfree profile only)

Make a long press on the **Pick-Up/Hang-Up Button(7)**. Audio will be on the SuperTooth II.

### AUDIO TRANSFER

#### **Kit to Phone**

Flip down the **Swivel Arm (1)** to 0° position (or turn-off the unit). This will automatically transfer the audio from the kit to the phone.

#### **Phone to Kit**

For Nokia Phones:

Flip up the **Swivel Arm** from 0° to 55° or 210° positions. (or turn-on the unit). This will automatically transfer the audio from phone to kit.

For Other Phone Models:

Flip the Swivel Arm up from 0° to 55° or 210° positions (or turn-on the unit).

Then press shortly the **Pick-Up/Hang-Up Button(7)**. The audio will be transferred from the phone to the kit.

### REJECTING A CALL (Handsfree Profile only)

Press **Reject Button(2)** to reject an incoming call.

### SETTING THE VOLUME

Set the volume using the **Volume Control(11)**.

1. Turn it clockwise to increase the volume.
  2. Turn it counter clockwise to decrease.
- Note: If the volume set is too high, it can cause feedback (whistling sound), echo, or background noise during calls on some cell phones.*
